

# Maid Hiring Platform — Product Documentation

## 1. Introduction

This document describes a platform designed to connect domestic workers with households in small cities like Darbhanga. The goal is to digitize an unorganized sector and provide a structured hiring experience.

## 2. Problem in Small Cities

- 1 Hiring is based on word-of-mouth
- 2 No centralized system
- 3 Lack of verification
- 4 Time-consuming and unreliable
- 5 Limited opportunities for workers

## 3. Proposed Solution

A web platform where maids create profiles and users search, filter, and connect with them in a structured and verified way.

## 4. Target Users

- 1 Working professionals
- 2 Families
- 3 Students
- 4 Domestic workers (cleaning, cooking, babysitting)

## 5. Core Features

- 1 Mobile OTP authentication
- 2 Maid profile creation
- 3 Search and filters
- 4 Request-based contact system
- 5 Ratings and reviews (future)

## 6. Location System

Area-based filtering initially, with future support for geo-location and distance-based matching.

## 7. Trust & Safety

- 1 Phone verification

- 2 Profile photos
- 3 Verified badges
- 4 Report/block functionality

## 8. Revenue Model

- 1 Paid contact unlock
- 2 Subscription plans
- 3 Premium listing for maids
- 4 Commission on hiring (future)

## 9. Pre-Launch Strategy

- 1 Use WhatsApp to onboard maids
- 2 Manually register 20–50 maids
- 3 Validate demand before launch

## 10. Challenges

- 1 Onboarding maids
- 2 Building trust
- 3 Low digital literacy
- 4 Fake profiles
- 5 Monetization

## 11. Future Expansion

- 1 Mobile app
- 2 Multi-language support
- 3 AI-based matching
- 4 Transport services for maids

## 12. Conclusion

This platform can transform how domestic help is hired in small cities, creating a structured, trusted, and scalable ecosystem.
